## Medici System

We create unique floors using our Medici Roller and the results will be as beautiful as they are strong. Custom texturing is possible via sponge rollers and foam brushes. With endless color combinations available, the installer is truly unlimited in their design and artistic finish.

## Polyurea

With 100% UV-Stability, the Medici System can be installed outdoors or in direct sunlight without any yellowing, chalking, or fading over time. Its high chemical resistance, low odor, ease of use, and extreme abrasion resistance make it the hottest coating system available. No other coating manufacturer has anything like this. The only way to get this look was to use acid stains, sprays, and dyes that are time consuming to install and don't hold up to heavy traffic. The Medici System is the optimal choice for showrooms, lobbies, restaurants, patios, offices, pool surrounds, and any other location needing that old world, mottled, natural finish and texture.
